

Pineland Properties owns and manages 104,000 acres of hardwood (predominantly) and mixed softwood/hardwood timberland North of Michigan's Upper Peninsula near Sault Ste. Marie, Ontario, Canada.

The company wants to immediately hire a land manager to manage forestry operations on the tract. The company currently has two forest technicians that are familiar with current operations and will report to the forest manager. All administrative operations are handled at the company's Alabama home office.

Responsibilities include:

- managing the timberland tract
- supervising the logging operations
- managing the sale, loading and transportation of the raw forest products (sawlogs, veneer, pulp). All of the raw products are currently shipped by rail to Canadian and US mills.
- managing current and future wind, mineral, and recreation leases on the property.

Skills and education needed:

- Graduate forestry degree
- Ability to accomplish work assignments on time
- Experience in working with loggers and ability to supervise logging operations
- Effective team player with demonstrated leadership capabilities, and a strong focus on results.
- Strong computer skills, with GIS experience considered an asset

Miscellaneous

- This will likely be a 6-8 year assignment
- The company prefers to hire an employee, but will also consider Forestry Consultant proposals.
- Time is of the essence....please respond immediately or forward to those whom you feel might be interested.
